Bring your models to life with products from

www.lifelites.com

Getting started:

Insert the supplied CR1225 battery into the battery holder with the positive contact facing away from the board and place the board into the housing.

Connecting the LED cables:

The LED cable plugs are polarized so you can only plug them in one way. Make sure the pins are aligned and press the plug into the socket. When disconnecting the cables, do not pull on the wires as this could result in irreparable damage to the plug/wire connections.

Turning the unit on and off:

While the unit is off -

Press button A to turn the unit on.

Hold button A for 2 seconds for a random light show.

While the unit is on -

Press button A to turn the unit off.

Hold button A for 2 seconds to reset the unit.

Accessing different patterns and speeds:

Press button B to access different flashing speeds for current pattern.

Hold button B to access different patterns. Lights will flash a certain Number of times to indicate which pattern is currently selected.

LifeLites products are made exclusively by Brickmodder Labs which has no affiliation with or endorsement from the LEGO® Group. Some LifeLites products contain repackaged LEGO elements. The LEGO Group is not liable for any loss, injury or damage arising from the use or misuse of LifeLites products which contain these repackaged elements.
